**Subject:** BUSTR Release #18000364-N00002 (former Aniline tank), Zaclon, 2981 Independence, Cleveland, Cuyahoga County

Erin,

Wanted to make sure of a site that has been in our system for a while now. We had a closure of a 4,500-gallon tank that contained aniline (hazardous substance listed in our Rule 03) that was removed on December 18, 1997. This tank was in a concrete vault that was surrounded/filled with k-crete. The closure sampling indicated that aniline was detected at an estimated (J-flag) concentration of 180 ug/kg, which is above the method detection limit, but below the reporting limit of 1,000 ug/kg.

We currently have this listed as a LTF 7, due to the j-flag detection, with a note that this was forwarded to US EPA (likely in the 1990s).

The site is currently being investigated with the intent of going into the Ohio EPA's Voluntary Action Program (VAP) to address other site issues. They need to clear up any remaining BUSTR issues prior to becoming eligible for the VAP.

I wanted to make sure that this release file was part of the list of hazardous substance sites and to make sure we were in agreement.

If you want to give me a call we can discuss.

Thanks

**Scott Sigler**
